

PROFILE

Data and analytics professional with 3+ years of experience using SQL, Python, and Power BI to turn complex data into clear business insights. Skilled in dashboard development, semantic model optimisation, reporting automation, and practical AI/ML applications. Strong background in business intelligence and data science, with experience across data cleaning, analysis, modelling, and stakeholder communication. **No sponsorship required to work in the UK.**

WORK EXPERIENCE

[ACO Technologies](#) | Shefford, UK

Power BI Business Analyst

Nov 2025 - Present (7 mos)

The ACO Group is one of the world's market leaders in drainage technology.

- Lead end-to-end improvements across data ingestion, storage, and reporting, improving data reliability, business visibility, decision-making, and cost efficiency
- Partner with stakeholders to understand reporting needs, shape priorities, and translate business questions into practical data and reporting solutions
- Develop business proposals for improvements across data ingestion, storage, and reporting to support measurable business value
- Manage an external team of data engineers, overseeing delivery, solution quality, and payment approvals
- Optimised Power BI semantic models, reducing CU usage across core models from 4M to 800K and delivering significant cost efficiency improvements
- Improved the performance, scalability, and usability of Power BI solutions, while supporting reliable data delivery through Azure Data Factory and Databricks pipeline issue resolution

[Skanska](#) | Durham, NC, USA

Analytics Developer

Jun 2023 - Sep 2025 (2y and 4 mos)

Skanska is one of the world's largest development and construction companies.

- Delivered **Python, Power BI, and SQL** solutions to improve project analysis, forecasting, and operational decision-making
- Built analytical and reporting solutions across 15+ data sources, improving reporting accuracy and reducing reconciliation issues by 30%
- Wrote and optimised SQL, DAX, and Power Query for datasets with 5M+ records, improving reporting efficiency by 50%
- **Developed ML- and LLM-based tools for automated analysis and planning**
- Performed data analysis to identify trends, anomalies, and opportunities for process improvement
- Built 30+ dashboards used by leadership and project teams to track KPIs across £1B+ of projects
- Reduced manual effort by 40% by streamlining reporting workflows and automating analytical processes

[Eridge Underwriting](#) | Tunbridge Wells, UK

Data and Business Services Assistant

Apr 2022 - Oct 2022 (7 mos)

Eridge Underwriting provides high-risk motor insurance for the Private Car, Commercial Vehicle, Taxi, and Motor Trade markets.

- Analysed insurance data using R, Power BI, QlikView, and Excel to identify trends, performance issues, and sources of revenue reduction
- Investigated declining broker performance and identified the root cause, supporting business action
- Built automated analysis reports to improve workflow efficiency and reduce time spent on low-value pricing activity
- Improved weekly reporting processes through automation, reducing manual effort by **30%**

EDUCATION

[Mendeleev University of Chemical Technology](#) | Moscow, Russia

Bachelor's Degree in Biotechnology Engineering

[General Assembly](#) | USA

**Data Science Fellow:** Completed hands-on training in Python, machine learning, data analysis, and predictive modelling. Built data science projects, including an MRI image classification application.

Professional Development:

- **May 2026:** Agentic AI Level 1 - Fundamentals, SuperDataScience
- **June 2025:** Fabric Analyst in a Day, Pragmatic Works
- **November 2024:** Plan, Create and Deliver Your Data Story, Storytelling with data
- **October 2022:** Data Analyst in SQL, DataCamp / Data Analyst in Power BI, DataCamp
