

TATIANA PATRUSHEVA

Data & AI Lead | Enterprise AI · Data Platform Engineering · Microsoft Fabric

Microsoft Certified: SQL AI Developer Associate (DP-800)

Milton Keynes, UK | 07535 294935 | patrushevtatiana@gmail.com | [LinkedIn](#) | [Portfolio](#)

Right to work in the UK — no sponsorship required

PROFILE

Data and AI professional who builds AI on real business data — and measures whether it can be trusted. Works across vector search, RAG and retrieval evaluation alongside hands-on data engineering in Microsoft Fabric, Azure Data Factory and Databricks. Currently leading a Fabric platform migration spanning architecture, supplier selection, data preparation and technical sign-off. Measurable impact: 80% reduction in platform capacity cost, external support spend taken to zero by insourcing, and 30+ leadership dashboards across £1B+ of projects.

SELECTED AI PROJECTS

- **VoC Risk Scorecard** — Voice-of-Customer risk pipeline using SQL Server vector search over reviews, support chats and tickets; measured retrieval precision and recall against a hand-labelled corpus instead of trusting similarity scores, exposing failure modes a naive RAG pipeline hides. Microsoft SQL AI Promptathon, 2026.
- **Subreddit Pulse** — deployed agentic app turning any subreddit into a structured digest; GPT-4o-mini with domain-locked tool retrieval, grounding rules against fabrication, and explicit handling of missing evidence.

WORK EXPERIENCE

ACO Technologies | Shefford, UK — **Power BI Business Analyst**

Nov 2025 – Present

- **Platform migration & data engineering:** own the client side of the **Fabric migration** (go-live Oct 2026) and all data preparation — selected the supplier, designed the capacity architecture, specify the tables, columns and calculations they build to, test their delivery and hold sole sign-off on go-live readiness; keep the existing **Azure Data Factory** and **Databricks** pipelines running through the transition
- **AI enablement:** first point of contact for AI questions from the business; scoped an AI-assisted improvement to a core business workflow, and work with group IT on which AI capabilities can be enabled and under what controls
- **Vendor & cost management:** took platform support in-house in June 2026, **removing ~£4k/month** of external support spend; built the Fabric business case, projecting a further **50%** cut in platform running costs at go-live; previously managed 2 external data engineers, owning delivery, quality and payment approvals
- **Platform cost engineering:** re-engineered core semantic models, reducing capacity usage from **4M to 800K CU (~80%)** and significantly improving performance and scalability

Skanska | Durham, NC, USA — **Analytics Developer (progressed from Data Visualization Specialist)** Jun 2023 – Sep 2025

- Delivered **Python, SQL** and **Power BI** solutions across 15+ data sources and optimised them on 5M+ record datasets — reconciliation issues down 30%, reporting efficiency up 50%, manual effort down 40%
- **Data science:** developed **ML- and LLM-based tools** (OpenAI APIs, TensorFlow, time-series forecasting) for automated analysis and project planning
- Built **30+ dashboards** used by leadership and project teams to track KPIs across **£1B+ of construction projects**

Eridge Underwriting | Tunbridge Wells, UK — **Data & Business Services Assistant**

Apr 2022 – Oct 2022

- Analysed insurance data using R, Power BI, QlikView and Excel to identify the root cause of declining broker performance; automated weekly reporting, cutting manual effort by 30%

KEY COMPETENCIES

AI & Machine Learning: LLMs, OpenAI APIs, RAG, Vector Search & Embeddings, Agentic AI, TensorFlow, Time-Series Forecasting

Data Engineering: Microsoft Fabric, Azure Data Factory, Azure SQL, Databricks, ETL/ELT Pipelines, Data Modelling, Data Quality

BI & Analytics: Power BI (DAX, Power Query, Semantic Models), Paginated Reports (SSRS), Data Storytelling

Programming: Python, SQL, DAX, R

Leadership & Ways of Working: Vendor & Team Management, Stakeholder Management, Cost Optimisation, Business Cases, GitHub

EDUCATION & PROFESSIONAL DEVELOPMENT

General Assembly — Data Science Fellow: Python, machine learning, predictive modelling, built an MRI image-classification application

Mendeleev University of Chemical Technology, Moscow — Engineer's Degree (5-year), Biotechnology

Certification: Microsoft Certified: SQL AI Developer Associate — DP-800 (2026)

Professional development: Agentic AI Level 1 – Fundamentals (SuperDataScience, 2026);

Fabric Analyst in a Day (Pragmatic Works, 2025);

Plan, Create and Deliver Your Data Story (Storytelling with Data, 2024)
